WORK EXPERIENCE

Full Stack Developer - Framework Digital
August 2021 - Present

- As a full-stack developer, I work with React and .NET, with focus in React.

- Increase in test coverage percentage from 50% to 90% using React Testing Library and Jest in frontend code.

- In charge of primarily developing query and registration screens, creating designs with a focus on good user usability.

- Refactorings and creation of components to make the project increasingly standardized and easily maintainable.

- Work with Scrum methodology, using Azure DevOps and Git flow for project management and version control.

Frontend Developer (Internship) - Framework Digital
April 2021 - July 2021

- Responsible for developing registration formularies and documenting previously created components within the project.
